Executive Summary

BDCO — Current period: 2024-12-31 | Prior period: 2023-12-31

BDCO posted $318M in revenue (-19.8% YoY) and -$8.6M in net income versus $31M in the prior period for 2024-12-31. The profitability profile is defined by operating margin of -1.4% and net margin of -2.7%, framing the earnings quality behind the headline figures.
Current ratio stands at 0.70x in the locked annual basis, but negative operating or free cash flow tempers what would otherwise look like a comfortable liquidity buffer. The quick ratio of 0.14x still shows current-asset coverage after excluding inventory, but it does not offset the current cash burn.

Cash generation is anchored by -$16M in operating cash flow versus $20M in the prior period, which converts to -$16M in free cash flow versus $20M in the prior period. Capital expenditures of $46K (0.0% of revenue) show the reinvestment burden required to sustain the current operating base.
