Executive Summary

GLE — Current period: 2025-06-30 | Prior period: 2024-06-30

GLE posted $2.9M in revenue (-53.6% YoY) and -$744K in net income versus $332K in the prior period for 2025-06-30. The profitability profile is defined by operating margin of -30.8% and net margin of -25.3%, framing the earnings quality behind the headline figures.
Current ratio stands at 3.44x in the locked annual basis, but negative operating or free cash flow tempers what would otherwise look like a comfortable liquidity buffer. The quick ratio of 3.44x still shows current-asset coverage after excluding inventory, but it does not offset the current cash burn.

Cash generation is anchored by -$1.2M in operating cash flow versus $231 in the prior period, which converts to -$1.3M in free cash flow. Capital expenditures of $169K (5.7% of revenue) show the reinvestment burden required to sustain the current operating base.
